**About Canadian Energy Services & Technology Corp.**

CESTC is a leading provider of technically advanced consumable chemical solutions throughout the lifecycle of the oilfield. This includes solutions at the drill-bit, at the point of completion and stimulation, at the wellhead and pump-jack, and finally through to the pipeline and midstream market. CESTC’s business model is relatively asset light and requires limited re-investment capital to grow. As a result, CESTC has been able to capitalize on the growing market demand for drilling fluids and production and specialty chemicals in North America while generating free cash flow.
