Forward Looking Information and Statements

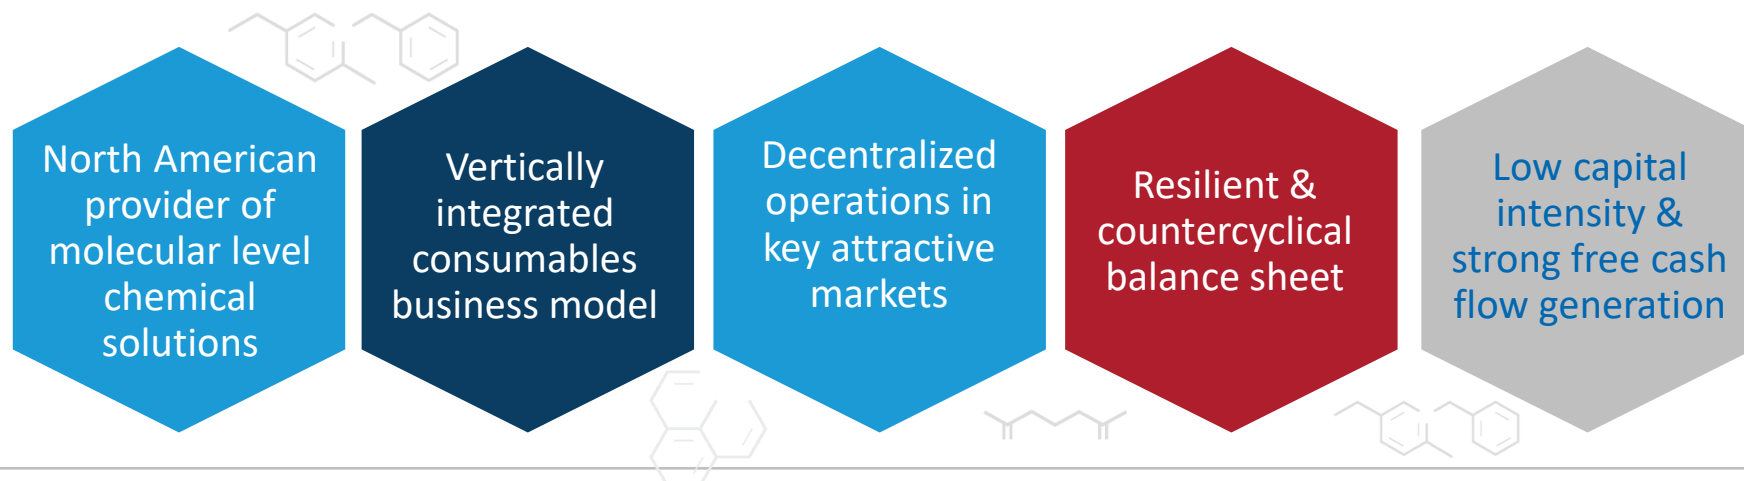

Certain statements in this presentation may constitute forward-looking information or forward-looking statements (collectively referred to as “forward-looking information”) which involves known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements of CES Energy Solutions Corp (“CES”), or industry results, to be materially different from any future results, performance or achievements expressed or implied by such forward-looking information. When used in this presentation, such information uses such words as “may”, “would”, “could”, “will”, “intend”, “expect”, “believe”, “plan”, “anticipate”, “estimate”, and other similar terminology. This information reflects CES’ current expectations regarding future events and operating performance and speaks only as of the date of this presentation or as of the date otherwise specified. Forward-looking information involves significant risks and uncertainties, should not be read as a guarantee of future performance or results, and will not necessarily be an accurate indication of whether or not such results will be achieved. A number of factors could cause actual results to differ materially from the results discussed in the forward-looking information, including, but not limited to, the factors discussed below. Management of CES believes the material factors, expectations and assumptions reflected in the forward-looking information are reasonable but no assurance can be given that these factors, expectations and assumptions will prove to be correct. The forward-looking information contained in this document speaks only as of the date of the document, or as of the date otherwise specified and CES assumes no obligation to update or revise such information to reflect new events or circumstances, except as may be required pursuant to applicable securities laws or regulations.

In particular, this presentation contains forward-looking information pertaining to the following: expectations regarding growth for drilling fluids as a result of increasing well complexity and longer lateral lengths; expectations regarding chemical demand and growth related to increased oil production and produced water; potential for continued growth in drilling fluids and production chemical markets; expectations regarding the performance of CES’ business model and counter cyclical balance sheet during downturns; expectations regarding the ability for CES to continue to grow revenue, market share and margins; expectations regarding improving results, increasing activity & market share, and the ability to obtain price increases from customers; ability for CES to make strategic inventory purchase in the future; impact of vertical integration and new technologies on future results; allocation of capital with respect to dividends, debt repayment, and the NCIB; expectations regarding cost reductions going forward; certainty and predictability of future cash flows and earnings, including during low points in the business cycle; expectations regarding the ability to implement price increases for customers; estimated timing and expectations regarding future capital expenditures and expansion projects; ability for CES’ business to generate significant free cash flow going forward; and expectations regarding CES’ ability to collect accounts receivable in light of historical performance and current circumstances.

CES’ actual results could differ materially from those anticipated in the forward-looking information as a result of the following factors: general economic conditions in the US, Canada, and internationally; geopolitical risk; fluctuations in demand for consumable fluids and chemical oilfield services, downturn in oilfield activity; oilfield activity in the Permian, the WCSB, and other basins in which the Company operates; a decline in frac related chemical sales; a decline in operator usage of chemicals on wells; decreased service intensity levels; an increase in the number of customer well shut-ins; a shift in types of wells drilled; volatility in market prices for oil, natural gas, and natural gas liquids and the effect of this volatility on the demand for oilfield services generally; declines in prices for natural gas, natural gas liquids, and oil, and pricing differentials between world pricing, pricing in North America, and pricing in Canada; decisions by OPEC regarding production quotas; the impact of the removal of sanctions on Russia and the potential for additional oil and gas supply to global markets; competition, and pricing pressures from customers in the current commodity environment; conflict, war and political and societal unrest that may impact CES’ operations, supply chains as well as impact the market for oil and natural gas generally; currency risk as a result of fluctuations in value of the US or Canadian dollar; liabilities and risks, including environmental liabilities and risks inherent in oil and natural gas operations; sourcing, pricing and availability of raw materials, consumables, component parts, equipment, suppliers, facilities, shipping containers, and skilled management, technical and field personnel; the collectability of accounts receivable; ability to integrate technological advances and match advances of competitors; ability to protect the Company’s proprietary technologies; availability of capital; uncertainties in weather and temperature affecting the duration of the oilfield service periods and the activities that can be completed; the ability to successfully integrate and achieve synergies from the Company’s acquisitions; changes in legislation and the regulatory environment, including uncertainties with respect to oil and gas royalty regimes, programs to reduce greenhouse gas and other emissions and regulations restricting the use of hydraulic fracturing; pipeline capacity and other transportation infrastructure constraints; changes to government mandated production curtailments; reassessment and audit risk and other tax filing matters; changes and proposed changes to US policies including tax policies, policies relating to the oil and gas industry, or trade policies; impact of tariffs on the global economy, the energy industry, and the Company; international and domestic trade disputes, including restrictions on the transportation of oil and natural gas and regulations governing the sale and export of oil, natural gas and refined petroleum products; the impact of climate change policies in the regions which CES operates; the impact and speed of adoption of low carbon technologies; potential changes to the crude by rail industry; changes to the fiscal regimes applicable to entities operating in the US and WCSB; access to capital and the liquidity of debt markets; fluctuations in foreign exchange and interest rates, including the impact of changing interest rates on the broader economy; CES’ ability to maintain adequate insurance at rates it considers reasonable and commercially justifiable; and the other factors considered under “Risk Factors” in CES’ Annual Information Form for the year ended December 31, 2024, dated March 6, 2025, and “Risks and Uncertainties” in CES’ MD&A for the three months ended March 31, 2025, dated May 8, 2025.

TTM Q1 2025 Revenue By Geography

US operations

- Permian
- Eagle Ford
- Bakken
- Marcellus
- Scoop/Stack

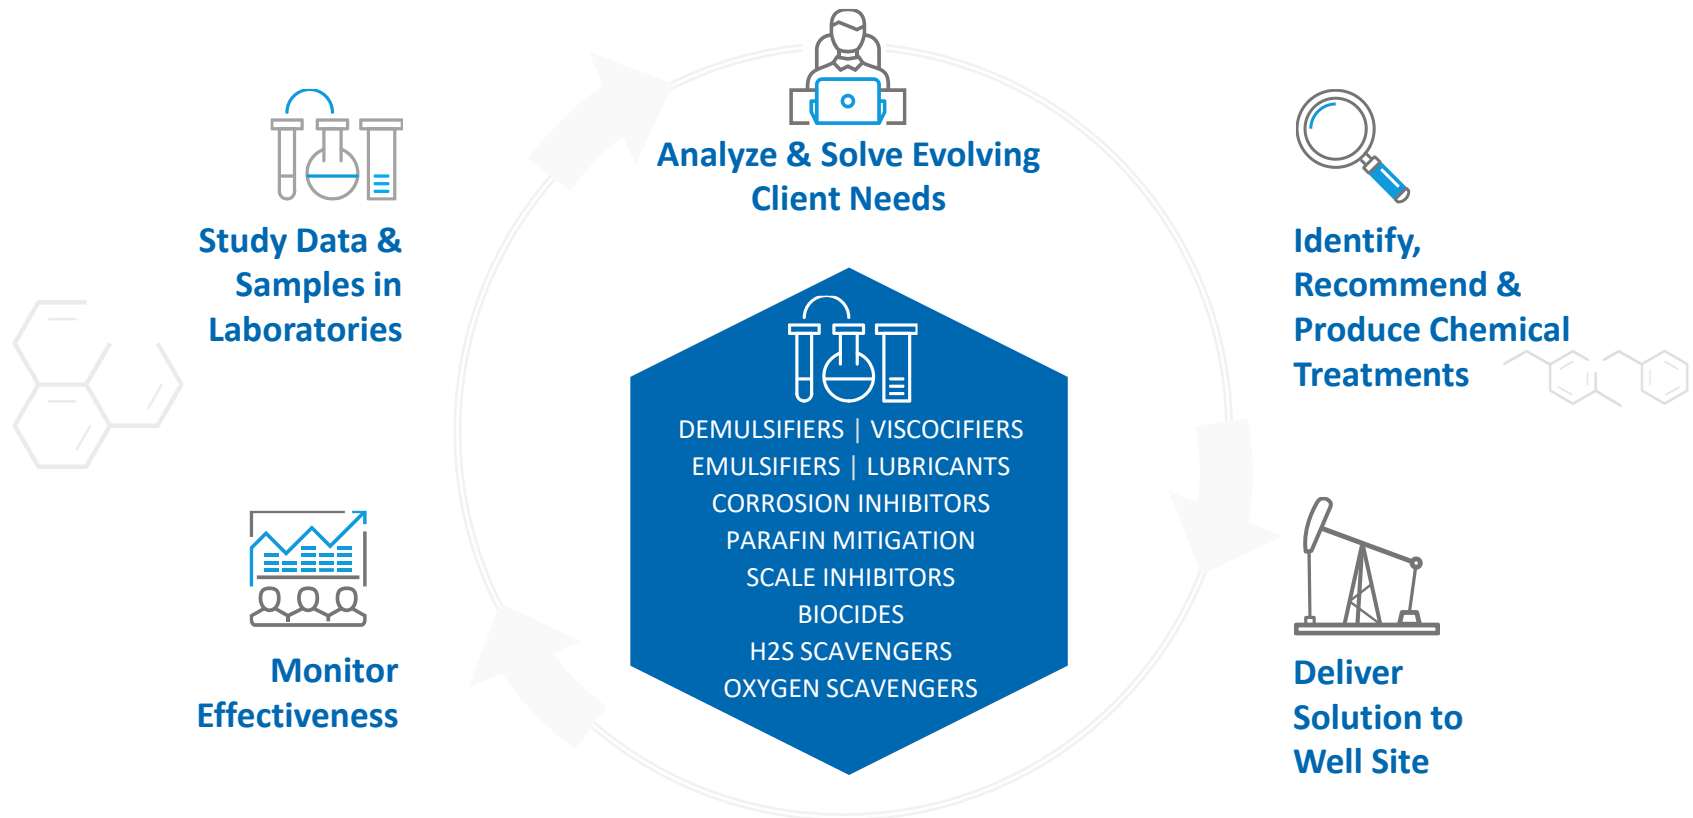

Canadian operations

- Montney
- Duvernay
- Deep Basin
- Oil Sands

Fully integrated world class basic chemical manufacturing capability combined with customer-centric problem solving culture for technology oriented customers

1. Includes patents, patents pending, and trademark registrations in multiple jurisdictions.

Solving Problems and Adding Value through Technology & Customer Service

Use chemistry, polymers and minerals to solve our customers' problems and optimize their production and drilling related needs to maximize their returns on investments through decentralized sales, service & problem solving approach

Improving Trends & Stable End Markets

Drilling Fluid Chemical Requirements Increasing

North American Crude Oil Production by Basin¹

North American Water Production²

Significant exposure to rising North American oil and gas and related water production stabilizes free cash flow generation through the cycles, while increasing well complexity and longer lateral lengths drives drilling fluid chemical growth

1. Non-GAAP measures or non-GAAP ratios that do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP Measures and Other Financial Measures" in CES' MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.com.
2. Supplementary financial measures are provided in this presentation where management believes they assist the reader in understanding CES' results. Refer to section entitled "Non-GAAP Measures and Other Financial Measures" in CES' MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.com.
3. Includes current and non-current portions of deferred acquisition consideration, lease obligations, long-term portion of PSU liabilities, and deferred financing costs.
4. Non-GAAP ratios that do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled "Non-GAAP Measures and Other Financial Measures" found within this presentation.

Non-GAAP & Other Financial Measures

Non-GAAP Measures & Non-GAAP Ratios

This presentation uses certain financial measures and ratios that are not recognized under IFRS, where management believes they assist the reader in understanding CES' results. These measures and ratios do not have a standardized meaning under IFRS and therefore may not be comparable to similar measures used by other issuers. The non-GAAP measures and non-GAAP ratios used in this presentation are described in CES' MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation, or as follows:

Free Cash Flow – is a non-GAAP measure that has been reconciled to cash provided by operating activities, being the most directly comparable measure calculated in accordance with IFRS. Free Cash Flow is defined as cash flow from operations after capital expenditures and repayment of lease obligations, net of proceeds on disposal of assets, and represents the Company's core operating results in excess of required capital expenditures.

Average Market Capitalization – is a non-GAAP measure that is calculated as the Weighted average – basic share count multiplied by the average share price in the relevant period.

Free Cash Flow yield – is a non-GAAP ratio that is calculated as Annualized Free Cash Flow, excluding changes in working capital, divided by the Average Market Capitalization, and represents the Company's core operating results in excess of required capital expenditures, and demonstrates the yield available to the equity holders from the respective operating periods.

Free Cash Flow excluding change in non-cash working capital and Free Cash Flow yield are reconciled to cash (from) provided by operating activities as follows:

	Q2 2023	Q3 2023	Q4 2023	Q1 2024	Q2 2024	Q3 2024	Q4 2024	Q1 2025
Cash provided by operating activities	89,327	99,922	39,292	86,328	83,245	72,860	62,231	60,091
Adjust for:								
Expansion Capital ⁽¹⁾	(12,639)	(16,026)	(16,541)	(17,084)	(15,357)	(20,484)	(15,155)	(16,137)
Maintenance Capital ⁽¹⁾	(6,761)	(4,170)	(2,345)	(5,462)	(6,289)	(5,349)	(5,818)	(13,292)

2. *Average share price for the respective period obtained from www.money.tmx.com.*

Non-GAAP & Other Financial Measures (cont.)

Total Debt / Adjusted EBITDAC – is a non-GAAP ratio that Management believes is a useful measure of the Company’s liquidity and leverage levels, and is calculated as Total Debt divided by Adjusted EBITDAC. Total Debt and Adjusted EBITDAC are non-GAAP measures that do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled “Non-GAAP Measures and Other Financial Measures” in CES’ MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.ca.

Net Debt / Adjusted EBITDAC - is a non-GAAP ratio that Management believes is a useful measure of the Company’s liquidity and leverage levels after removing working capital, and is calculated as Total Debt less Working Capital Surplus divided by Adjusted EBITDAC. Total Debt, Working Capital Surplus and Adjusted EBITDAC are non-GAAP measures that do not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled “Non-GAAP Measures and Other Financial Measures” in CES’ MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.ca.

Adjusted EBITDAC / Interest on Debt – is a non-GAAP ratio that Management believes is a useful measure of the Company’s ability to service its debt requirements, and is calculated as Adjusted EBITDAC divided by interest on debt calculated in accordance with IFRS. Adjusted EBITDAC is a non-GAAP measure that does not have any standardized meaning under IFRS and therefore may not be comparable to similar measures presented by other entities. Refer to the section entitled “Non-GAAP Measures and Other Financial Measures” in CES’ MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation and is available on SEDAR+ at www.sedarplus.ca.

Supplementary Financial Measures

A supplementary financial measure: (a) is, or is intended to be, disclosed on a periodic basis to depict the historical or expected future financial performance, financial position or cash flow of the Company; (b) is not presented in the financial statements of the Company; (c) is not a non-GAAP financial measure; and (d) is not a non-GAAP ratio. Supplementary financial measures found within this presentation are described in CES’ MD&A for the three months ended March 31, 2025, which is incorporated by reference into this presentation, or as follows:

Net Capex as a % of Revenue – calculated as total investment in property and equipment less proceeds on disposal of assets, divided by revenue for the period as determined in accordance with IFRS.

Expansion Capital - comprises a component of total investment in property and equipment as determined in accordance with IFRS, and represents the amount of capital expenditure that has been or will be incurred to grow or expand the business or would otherwise improve the productive capacity of the operations of the business.

Maintenance Capital - comprises a component of total investment in property and equipment as determined in accordance with IFRS, and represents the amount of capital expenditure that has been or will be incurred to sustain the current level of operations.
